Dear Twin Tiers Chapter Members,

Following the Region 1 CRC in August, we have had a great start to the year with our September Chapter meeting, held at the Binghamton Holiday Inn. The meeting revolved around a pair of presentations regarding cooling tower basics and tower water chemical treatment. I was happy to see such a great turnout that included both familiar faces from past meetings as well as many new ones.

Thank you, Mike McGinnis, for putting together September’s program and to our presenters, Adam Keller of Pro Air Plus, and Jerry Meyer Jr. of MIS of America. It is often overlooked, but our monthly programs would not be as educational, interesting and interactive without the participation and contribution of our presenters. A good percentage of September’s attendees were Binghamton University students who experienced firsthand what ASHRAE is all about, got their feet wet in the world of HVAC, and mingled with a lot of the regular members. Thank you, Jason Gilbert, for continuing to encourage student participation.

In the month of October, we will be holding the 2017 Southern Tier Professional Development Symposium at the Binghamton Holiday Inn Arena. This annual joint event with NYSSPE, ACEC, and ASCE, will feature a wide variety of presentations and will offer the opportunity to earn up to 6.5 professional development hours. For more details on the topics and schedule, refer to our chapter website or the information enclosed within this newsletter.

ASHRAE is an organization of volunteers, both at the chapter and national level. The society is built upon the participation of people like you – students, contractors, faculty, equipment manufacturers, HVAC professionals and many others from every facet of the HVAC&R industry. Membership in our organization makes you part of this diverse network of people. In addition, you will gain access to many valuable resources such as the ASHRAE Handbook, Journal, E-newsletters, discounts on ASHRAE publications and merchandise and have an opportunity to get involved at the chapter level. Contact Chris Wolak (Chris.Wolak@victaulic.com) if you, or someone you know, are interested in learning more about membership opportunities.

Thank you for your continued support and membership in this great organization.

Warm Regards
-Petros Papathomopoulos

Dear ASHRAE Twin Tiers Member or Research Promotion (RP) Supporter,

As the RP Chair and a fellow member of the Twin Tiers Chapter, I wanted to personally ask you for your help in supporting ASHRAE Research. ASHRAE’s research program, established in 1912, supports 140 research projects with a combined value of more than $15 million. Research focus includes energy and resource efficiency, indoor environmental quality, design, operation and management tools, alternative technologies, and materials and equipment. Through scholarships, grants and awards, the Society supports engineering education for undergraduate students and research projects for graduate engineering students and new post-doctoral scholars.

For Research Information please see the following site:
https://www.ashrae.org/standards-research--technology/ashrae-rp
You can either donate directly with a credit card, see link below:
https://xp20.ashrae.org/secure/researchpromotion/rp.html
or send a check to:
ASHRAE Research Promotion
att. Patricia Adelmann
1791 Tullie Circle NE
Atlanta, GA 30329
Make check payable to “RP Donation-ASHRAE Twin Tiers”

Again, a personal Thank You for the following who have donated last year:

**Air Temp Heating & Air Conditioning Inc**
- Mark Mattina
- Michael McGinnis

**Louis N Picciano & Son Incorporated**
- Petros Papathomopoulos
- Plumbers & Pipefitters Union 112
- Francis Plunkett
- Glenn Roberts
- Norman Scott
- Devin Shapley

I hope that ASHRAE and I can count on your support this year.
Email me, or come see me at a Chapter Meeting if you have any questions.

Glenn Roberts
Twin Tiers Research Promotion Chair

SEPTEMBER Meeting Summary

Date: SEPTEMBER 19, 2017

The September 2017 meeting consisted of two presentations. Adam Keller from Pro Air Plus discussed COOLING TOWER BASICS as the tech talk before dinner. After dinner Jerry Meyers from MIS of America spoke about COOLING TOWER SHUT-DOWN AND NSF LEGIONELLA GUIDELINES.

Twin Tiers ASHARE would like to thank all who attended

Twin Tiers Chapter – September BOG Meeting Minutes

http://twintiers.ashraechapters.org

Agenda

Meeting was called to order at 4:05

- Call to Order and Attendance: Mike M., Devin S., Kyle N., Jason G., Petros P., Glenn R., Andy N., Adam K.
- General Announcements: None
- Treasurer’s Report (Devin Shapley & Kyle Nedlik):
  - M&T:
  - PayPal:
  - H.O. Ward:
  - William & Joan Alberns:
  - Audit: Treasury Report has been submitted. No issues found.
    - Update treasurer report to designate pass through items
- CTTC (Mike McGinnis / Kyle Nedlik)
  - Fall Symposium(Kyle): 3 out of 4 speakers currently approved
    - Coordinate BOG meeting separate
  - Monthly Meetings (Mike): - NOV tour – no Wegmans, alternate option?
- YEA (Devin Shapley):
- Membership Promotion (Chris Wolak): via e-mail: Attended centralized training in Atlanta
  97 Members
  38 Students
- New Members:
  Christopher Hackett MJ
  Ibrahima Balde MJ
  Charles Grochowiak BU
- Delinquent Members:
  George R Lampila
  Alexander James Merry
  Christopher G Stone
  Ian D Morrell
  Mark J Mattina
  Tom E Jordan, PE
  Michael A Eckhardt
  - Update student members as of 9/19
Twin Tiers Chapter – September BOG Meeting Minutes

- GGAC (Adam Keller): update contact list, input CRC points, email goals to head GA
- Student Activities (Jason Gilbert): E-Board to Organize GIM
  - Chicago trip – plans to raise funds?
  - No Alfred update, Mike – BCC

Travis: Update on Cornell?

- Research Promotion (Glenn Roberts): RP Donations. $50 or 50% reimbursement?
- PAOE (Petros Papathomopoulos): Reminder to chairs that they can update PAOE points.

2018 Call for Entries

It starts with ONE can. To feed the hungry. To lift the spirit. To change the world. Construction is an international hunger-relief competition where groups compete to design and build giant structures made entirely from canned foods! 100% of monetary and food donations from Construction will go towards the Food Bank of the Southern Tier and CHOW’s hunger-relief work in Broome County.

The Southern Tier is joined by 100 cities across North America who will hold Construction competitions in the coming year. Highlighting the creativity and compassion of architectural and engineering groups, these astounding structures are helping to change the world—by lifting the spirits of those in need, by raising public awareness, and most importantly, by collecting millions of pounds of food for local food banks.

Do you think you have what it takes to design and build a structure made of nothing more than canned food?

When: April 8 - 15, 2018
Where: Oakdale Mall, 601-635 Harry L. Drive, Johnson City, NY
Costs: Entry Fee is $100 per team (non-refundable)

Teams are responsible for acquiring the canned food for their structures

For more information: visit www.foodbankst.org/construction or contact the Construction Chair, Kyle Nedlik, via email at BLI.Construction@gmail.com

Please complete this form and mail with your payment by Friday, January 12, 2018 to:
Food Bank of the Southern Tier | 388 Upper Oakwood Avenue, Elmira, NY 14903 | 607.796.6061
What Were They Thinking???

Who approves of things like this...

Do you have a funny, “unique”, or just plain horrible installation picture? Please send them to the Editor at anice@meiersupply.com

As a licensed professional in New York State, it is your professional responsibility to know the legal and ethical requirements governing the practice of your profession and to be alert to changes in those requirements. The New York State Board for Engineering and Land Surveying, in an effort to help you stay abreast of your professional responsibilities, has developed this short, self-study educational activity in ethics.

This educational activity is based on the New York State Education Law Articles 130 and 145, the Rules of the Board of Regents Parts 1, 3, 17, 18, 28, 29, 31, and the Regulations of the Commissioner of Education Parts 59 and 68. It is strongly recommended that, prior to taking the self test, you review these foundational materials (http://www.op.nysed.gov/prof/pels/pelay.htm) on the engineering web site.

Once you have reviewed the foundational materials, proceed to complete the self test below. When you have completed the self test, click the "Get your score" button at the bottom of the page. You should print this screen and save it as evidence of satisfactory completion of this educational activity. A score of 90% or greater will allow you to claim 1 Professional Development Hour (PDH) of educational activity credit in ethics ONCE in each three-year registration period. Retain your printed screen for no less than 6 years from the date of completion.

Take Your PE Ethics Self Test Here!

### ASHRAE HVAC Design Training

**2 Courses, 5 Days of Intense Instruction**
- Atlanta
- Dallas
- Doha
- Hartford
- Toronto

**HVAC Design: Level I – Essentials** - Registration is $1,264 ($1,009 ASHRAE Member)

Gain practical skills and knowledge in designing and maintaining HVAC systems that can be put to immediate use. The training provides real-world examples of HVAC systems, including calculations of heating and cooling loads, ventilation and diffuser selection using the newly renovated ASHRAE Headquarters building as a living lab.

**HVAC Design: Level II – Applications** - Registration is $554 ($489 ASHRAE Member)

**HVAC Design: Level II – Applications** provides instruction on HVAC system design for experienced HVAC designers and those who complete the HVAC Design: Level I – Essentials training. The training provides information that allows practicing engineers and designers an opportunity to expand their exposure to HVAC systems design procedures for a better understanding of system options to save money.

Visit [www.ashrae.org/hvactraining](http://www.ashrae.org/hvactraining) to register and learn how your Chapter can earn PAOE points.

Contact Karen Murray (kmurray@ashrae.org) to discuss scheduling ASHRAE HVAC Training in your Chapter area.

Governor Cuomo Announces Imperium3 New York to Establish Lithium Ion Battery Giga-Factory in the Southern Tier

www.governor.ny.gov

By Press Office of NYS Governor Oct. 04, 2017

Governor Andrew M. Cuomo today announced Imperium3 New York, Inc., a consortium of businesses spearheaded by three Southern Tier companies, will establish research and development and production operations at the Huron Campus in Endicott, Broome County. The consortium will invest more than $130 million and create at least 230 new jobs over the next five years. Imperium3 New York will commercialize an innovative technology for making more efficient and less expensive lithium ion batteries while operating the state’s first gigafactory producing lithium ion batteries, producing three gigawatts of batteries by Q4 2019 and growing to fifteen gigawatts.

“This consortium of local businesses is choosing to stay and invest their next generation technology right here in the Southern Tier, breathing new life into vacant facilities and creating hundreds of good jobs for New Yorkers,” Governor Cuomo said. "Our investments to improve the business climate and spur economic development across Upstate New York are paying off, and this innovative project is yet another example of how the Southern Tier is soaring."

The Imperium3NY consortium was formed by nearly 10 companies, with three Southern Tier companies serving as its backbone:

- C4V (Binghamton) will provide the core intellectual property
- C&D Assembly (Groton) is supplying electronic board assembly and battery testing
- Primet Precision Materials (Ithaca) is offering advanced processing of materials

Other New York State companies involved include Kodak and CMP Advanced Mechanical Solutions. The general market for lithium-ion batteries continues to grow daily and serves multiple industries, including renewable energy projects, electric vehicle manufacturers, cell phone and other electronic product makers, among many others. Industry experts consider C4V’s batteries to be more efficient and less costly than other lithium-ion batteries on the market today.
Governor Cuomo Announces Imperium3 New York to Establish Lithium Ion Battery Giga-Factory in the Southern Tier (Cont.)

Imperium3NY will locate operations at the Huron Campus in Endicott, establishing a new $130 million lithium-ion battery production giga-plant and hiring 232 employees, ultimately ramping to 15 giga-watts of production and hundreds more jobs. To encourage this collaborative effort, Empire State Development has offered performance-based incentives totaling $7.5 million, including a $4 million Upstate Revitalization Initiative grant and $3.5 million in Excelsior Jobs Program tax credits. Additionally, Imperium3NY is expected to qualify for an estimated $5.75 million in New York Investment Tax Credits.

In 2016, C4V was recognized for its innovative battery storage technology when it was named a $500,000 winner in New York State’s first 76West Clean Energy Competition. Administered by the New York State Energy Research and Development Authority, 76West is one of the largest competitions in the country that focuses on supporting and growing clean-energy businesses and expanding innovative entrepreneurship in the Southern Tier.

Additionally, Magnis Resources, Ltd., a publicly-traded Australian company, will provide anode materials needed for the consortium to make the innovative lithium-ion batteries; and Boston Energy and Innovation, another Australian business specializing in clean energy, will provide international sales and marketing opportunities. More than twenty international companies have been qualified by C4V as strategic suppliers of high-quality lithium, electrolyte, separator and other critical raw ingredients to Imperium3NY that includes a Lithium mine just hours from Binghamton.

Dr. Shailesh Upreti, President of C4V, said, "We are excited by the support shown to our consortium by the New York State Government. Green manufacturing in combination with the best utilization of an existing infrastructure in a distributed fashion would create an unmatched example internationally and make New York a global leader in product and component manufacturing for energy storage. C4V is very excited to be part of this scale up initiative and is fully committed to make this happen right here in New York."

Jeff Cronk, CEO of C&D Assembly, said, "My company has always been about the local content, local skill and all markets. We have been supplying electronics parts, components and end products to global market for last 25 years and actively looking for new projects that govern the future of the human race. C&D’s current manufacturing floor is capable of handling battery management system production for up to 20GWh annually assuming each battery is 80kWH in size. Our knowledge base and deep understating of product quality control would give the New York consortium a significant edge in the market and I am very excited to be part of this consortium."
Robert Dobbs, President of Primet Precision Materials, said, "Performance of a battery lies in the material composition and particle features. A good control over particle shape and size is key to extract best performance out of a molecule. Primet has developed and demonstrated its powder technology on tonne scale with various materials used in Li-ion batteries. Our demonstrated ability to reduce the capital investment as well as operational expenses would allow this consortium to build batteries that are not only high performing but also very economical versus batteries from Asia."

Empire State Development President, CEO and Commissioner Howard Zemsky said, "The Southern Tier is becoming a hub for research, innovation and advanced manufacturing, and Imperium3NY's decision to establish a giga-factory in Endicott is yet another indicator of the region's bright future. This project will create hundreds of jobs and we are thrilled to see a concept that was developed here, will be commercialized right here in Upstate New York."

Alicia Barton, President and CEO, NYSERDA said, "This new consortium is a tremendous step forward in helping New York meet Governor Cuomo's aggressive clean energy goals by supporting both this emerging industry and new start-up companies. One of the reasons the 76West Clean Energy Competition exists is to enable companies to grow their businesses and create jobs in the Southern Tier, and we are thrilled that C4V has a central role in this project and in the Southern Tier's clean energy ecosystem."

Governor Andrew M. Cuomo today announced that the City of Cortland will receive $10 million in funding as the Central New York winner of the second round of the Downtown Revitalization Initiative. As in the first round of the DRI, one municipality from each of the state's 10 regional economic development regions will be selected as a $10 million winner, marking another overall state goal to target $100 million in funding and investments to help communities identify catalytic downtown projects to boost the local economy.

"New York continues to invest in our communities to attract the next generation of leaders and spur businesses development in downtowns across the state," Governor Cuomo said. "This funding will bring new life to downtown Cortland and assisting in its transformation into an economic engine for the entire region."

The Central New York Regional Economic Development Council went through a competitive review process of proposals from communities throughout the region and considered eight criteria before recommending Watertown as its nominee for winner:
INDUSTRY ARTICLE

Governor Cuomo Announces the City of Cortland as $10 Million Central New York Region Winner of Second-Round Downtown Revitalization Initiative (Cont.)

- The downtown should be compact, with well-defined boundaries;
- The municipality, or the downtown’s catchment area, should be of sufficient size to support a vibrant, year-round downtown;
- The downtown is able to capitalize on prior or catalyze future private and public investment in the neighborhood and its surrounding areas;
- There should be recent or impending job growth within, or in close proximity to the downtown that can attract workers to the downtown, support redevelopment and make growth sustainable;
- The downtown must be an attractive and livable community for diverse populations of all ages, including existing residents, millennials and skilled workers;
- The municipality should already embrace or have the ability to create and implement policies that increase livability and quality of life, including the use of local land banks, modern zoning codes and parking standards, complete streets plans, energy efficient projects, green jobs, and transit-oriented development;
- The municipality should have conducted an open and robust community engagement process resulting in a vision for downtown revitalization and a preliminary list of projects and initiatives that may be included in a DRI strategic investment plan; and
- The municipality has identified transformative projects that will be ready for implementation with an infusion of DRI funds within the first one to two years.

"This funding will bring new life to downtown Cortland and assisting in its transformation into an economic engine for the entire region."

Governor Andrew M. Cuomo

Tetra Tech is a leading provider of consulting, engineering, and technical services worldwide. Our reputation rests on the technical expertise and dedication of our employees—16,000 people working together across disciplines and time zones to provide smart, sustainable solutions for challenging projects. We are proud to be home to leading technical experts in water, environment, infrastructure, resource management, energy, and international development. Tetra Tech combines the resources of a global, multibillion dollar company with local, client-focused delivery in 400 locations around the world. We offer competitive compensation and benefits and are searching for innovative people to join our teams.

Tetra Tech A&E provides planning, design and construction phase services for a wide range of building types and clients, from K-12 and higher education facilities in New York to facilities supporting governments worldwide. We currently seek a Mechanical Engineer to work out of our Ithaca NY or Albany NY office.

**Responsibilities include:**
- Design of building mechanical systems (HVAC) including appropriate system concepts, calculations, energy modeling, layout, sizing, selections, specifications and coordination
- Perform site visits of existing mechanical systems for evaluation or to inspect work in progress or completed
- Review and respond to team member on project design work, RFIs, submittals, and other construction related documents and issues in a professional and timely manner
- Monitor and control project progress against scope, schedule, and budget
- Attend client meetings and assist in marketing efforts

**Requirements:**
- Bachelor’s degree in Mechanical Engineering, Mechanical Engineering Technology, or similar field with 8 years of experience designing building mechanical (HVAC) systems.
- Experience with Design of mechanical (HVAC) systems for educational facilities is desired.
- Licensed Professional Engineer (PE) or EIT and preparing to obtain professional licensure preferred.
- Proficient in AutoCAD and Revit/BIM with working knowledge of MS Office.
- Proficiency with building energy modeling concepts and software preferred.
- Knowledge of applicable codes and standards.
- Possesses and applies a broad knowledge of principles, practices and procedures to the completion of difficult assignments.
- Knowledge of and demonstrated interest in energy efficient solutions and designs.

If you are interested in this exciting opportunity apply on-line at: [http://www.tetratech.com/en/careers](http://www.tetratech.com/en/careers)

Tetra Tech is committed to creating a diverse environment and is proud to be an Equal Opportunity Employer. We invite resumes from all interested parties including women, minorities, veterans and persons with disabilities. Tetra Tech is a VEVRAA federal contractor and we request priority referral of veterans for available positions.

Senior Mechanical Engineer

Engineers thrive on solving problems by putting their logic and creativity together. They are able to invent, explore, and question to enhance the areas around us. IBI Group engineers work in multiple disciplines and collaborate on larger initiatives. IBI Group's Binghamton, New York office is searching for a Senior Mechanical Engineer to join its growing team.

Are you looking for a challenging opportunity that can move your career to the next level? Then come discover what IBI has to offer.

IBI Group offers you a career you can Define…Discover It!

Responsibilities:
- Responsible for the technical and design development for assigned projects.
- Functions in the role of project leader and handles project management tasks and supervises the mechanical design and technical aspects.
- Produces design work according to established standards, methods, and procedures of the office.
- Coordinates and develops the layout, design, drafting, and specifications produced by architectural and engineering staff members who are part of the project team.
- Develops project cost estimates.
- Supervises technical staff and provides design guidance.
- Supervises the preparation and checks the accuracy of contract documents.
- Incorporates applicable codes, construction techniques, and sequences in various projects including all aspects of cross disciplines.
- Conducts site observations as required to perform the design.
- Conducts site observations of mechanical systems during construction operations. Performs other associated construction phase tasks.

Qualifications:
- Experience in designing HVAC systems for educational, commercial, institutional, and industrial facilities
- In addition to HVAC system design experience; experience with Plumbing design and Fire Protection design strongly desired.
- At least 5 years design experience
- Bachelor's degree in Mechanical Engineering
- EIT required; Registration as a Professional Engineer in New York State strongly desired
- Working knowledge of AutoCAD, BIM/Revit
- Effective communication (verbal and written) in English
- Strong team player
- Highly proactive and detail oriented
- LEED certification is a strong asset

We are a global team of dedicated and experienced architects, engineers, planners, designers and technology professionals who share a common desire – to help our clients create livable, sustainable, and advanced urban environments. From high-rises to industrial buildings, schools to state-of-the-art hospitals, transit stations to highways, airports to toll systems, bike lanes to parks, we design every aspect of a truly integrated city for people to live, work, and play. Our collaborative and combined approach focuses not only on creating the best solutions today, but also determining the right solutions for tomorrow.

We believe cities in the future must be designed with intelligent systems, sustainable buildings, efficient infrastructure, and a human touch.

At IBI, we’re defining the cities of tomorrow.

Applicants for U.S. based positions with IBI Group must be legally authorized to work in the United States. Verification of employment eligibility will be required at the time of hire. Visa sponsorship is not available for this position.

IBI Group is an Equal Employment Opportunity/Affirmative Action Employer and maintains a Drug-Free Workplace.

Twin Tiers Chapter – Employment Opportunities

Senior Mechanical Engineer – Buildings

Your Opportunity:
Our Buildings Engineering group specializes in the design and development processes unique to buildings. Working closely with our clients, our dedicated professionals help to establish and understand the needs of a range of building projects. This is where great ideas and rewarding careers are built. For both public and private sector clients, we provide unique plan checking capabilities as well as energy engineering and performance engineering services, covering each of the major engineering disciplines- structural, mechanical, and electrical. In addition, we bring together innovative and functional design solutions for companies involved in the discovery, research and development, and commercial scale manufacturing of pharmaceuticals, biotechnology, and medical device products. Focused on providing cost-effective solutions to engineering challenges, we are involved in a diverse range of projects from the initial planning stages to design, construction, and commissioning. Our structure cultivates career growth and provides opportunities as unique as you are.

Your Duties:
- Duties will include but are not limited to preparation of project proposals and resulting contracts, project implementation plans, resource planning, quality control and design review, project team review and coordination, client, and financial management.
- May assist as mechanical engineering lead overseeing the engineering & design of plumbing / fire protection / HVAC and other mechanical systems for new and renovated buildings.
- Mechanical engineering - actual designs including the completion of code reviews, preparation of the basis of design, system calculations, mark-up of drawings, specification preparation, field investigations, construction estimating and site inspections and other such design as required to execute the mechanical construction for new or renovated buildings.
- May perform project manager duties as needed.
- Some travel to site locations or other Stantec offices may be required.

Your Capabilities and Credentials:
The successful candidate will possess:
- Requires a B.Sc. Mechanical Engineer
- NYS PE desired, registration in other states a plus
- 7+ years’ experience required
- Must have strong Mechanical Engineering skills in Plumbing, Fire Protection, HVAC, and related mechanical systems
- Prior management experience is a plus
- Prior consulting engineering experience is required
- Experience using Autocad, Revit, Trane Trace or Equest is a plus
- Excellent verbal and written communication skills
- Excellent interpersonal skills with team members and clients

We put people first, and it shows. We’re proud to be one of New York’s Best Places to Work, as named by The Business Council of New York and NYS-SHRM.

Please apply online directly at:
- (Endicott) https://jobs-stantec.icims.com/jobs/25927/senior-mechanical-engineer---buildings/job
Twin Tiers Chapter – Employment Opportunities

FACILITY MECHANICAL / HVAC ENGINEER

Job Number: 180818
Location: Corning, NY

Are you interested in “Life Changing Innovation”? As with Thomas Edison, we have a history of working with the world’s greatest innovators. We solve our customers’ most complex problems that others can’t or won’t. Collaboration, Innovative Spirit and Career Development are just a few of the reasons world class professionals choose Corning Incorporated for a career. We are headquartered in Corning - a vibrant city in Upstate, NY where residents enjoy the benefits of a rich arts and culture scene, one of the world’s fastest-growing wine regions and a family friendly area with affordable homes and quality education.

Corning is the world leader in specialty glass and ceramics, creating and manufacturing keystone components that enable high-technology systems. Corning’s history is filled with breakthrough technologies that have played an important role in the way the world works. We thrive on solving difficult, commercially relevant problems through an innovative and collaborative research and development process. Corning succeeds through sustained investment in R&D, more than 160 years of materials science and process engineering knowledge, and a distinctive collaborative culture.

Scope of Position:
- Provide HVAC engineering & project leadership in a corporate engineering group that supports all divisions within Corning Incorporated.
- Apply fundamental engineering principles to develop, design & resolve solutions to a variety of technical problems related to HVAC and facility mechanical systems & processes.
- Develop criteria and specifications for various facility equipment, systems & processes.
- Collectively work with division, process, plant & R&D resources on project teams.
- Develop, review & forecast capital & expense design, equipment & installation project costs.

Day to Day Responsibilities:
- Deliver strong project leadership skills through the project initiation, planning, implementation and closeout phases.
- Develop project concepts, scopes, estimates, schedules, design, installation & startup documentation.
- Exercise sound judgment, solid engineering principles and utilize structured problem solving techniques.
- Lead, guide, coach & help develop internal Corning & contingent employees as well as external contractors.
- Actively work and participate in project teams in various roles and capacities.
- Effectively listen and communicate utilizing multiple channels and means.

Travel Requirements:
- Travel can be greater than 50% both Domestic and International.
- Project assignments can be in excess of 1-2 years in duration.

Hours of work/work schedule/flex-time:
- Flexibility is required.
- Normal Business Hours (8 – 5, M – F): however, expected to work hours required to achieve objectives. Includes overtime, weekend and off-shift hours.
FACILITY MECHANICAL / HVAC ENGINEER (Cont.)

Required Education:
- BS degree in Mechanical Engineering
- MS in Mechanical Engineering preferred.

Required Years and Area of Experience:
- 5-10 years of engineering & professional work experience.
- Required Skills:
  - Excellent project leadership, HVAC engineering, installation and start-up skills.
  - Able to apply HVAC & Mechanical engineering principles to concepts, designs, trouble shooting and solving problems.
  - Problem solving skills and the use of structured methods; such as, K-T (DA, PPA, RA), DESGN & DMAIC.
  - Excellent communication and interpersonal skills.
  - Excellent presentation skills.
  - Solid HVAC & Mechanical system trouble shooting capabilities & experience.
  - Project estimating, forecasting and scheduling experience.

Desired Skills:
- Proficient in MS Project & SharePoint.
- Experience with AutoCad and Solidworks.
- Professional Engineering Certification.
- PMI certification.
- Proficiency in Mandarin, Spanish or Japanese.

Soft Skills:
- Results oriented.
- Strives for excellence & high quality.
- Strong commitment and work ethic.
- Positive attitude.
- Flexible and adaptable.
- Open, honest & trustworthy.
- Strong listening & communication skills.
- Approachable and a team player.

EOE/AA including Veterans and Disabled.

IF YOU ARE INTERESTED IN THIS OPPORTUNITY, PLEASE FEEL FREE TO CONTACT ANNE LAPORTE AT 716-276-3837 OR LAPORTEAM@CORNING.COM
Facilities Engineering Project Manager

Job Number: 182585  
Location: Corning, NY

Are you interested in “Life Changing Innovation”? As with Thomas Edison, we have a history of working with the world’s greatest innovators. We solve our customers’ most complex problems that others can’t or won’t. Collaboration, Innovative Spirit and Career Development are just a few of the reasons world class professionals choose Corning Incorporated for a career. We thrive on solving difficult, commercially relevant problems through an innovative and collaborative research and development process. Corning succeeds through sustained investment in R&D, more than 160 years of materials science and process engineering knowledge, and a distinctive collaborative culture.

**Scope of Position:**
Manage the development and implementation facility and capital projects involving departmental and/or cross-functional teams focused on the construction of new or existing productions facilities.

**Day to Day Responsibilities:**
- Provide project management for key manufacturing capital projects. Overall responsibility for the ensuring the project’s compliance with safety, scope schedule, cost, and other project specific deliverables such as those associated with product quality, equipment and process capability, machine and line rates, equipment uptime, etc.
- Direct supervision of project team resources, approximately 10 – 15 members. Provides guidance to subordinates to achieve goals in accordance with established policies.
- Establish requirements with customer.
- Assist in the evaluation and verify justification for project.
- Identifies and drives key decisions for such things as scope, design, schedule, spending, vendor selection, etc.
- Establish roles, responsibilities and competencies required for the project.
- Establish project team working with division management.
- Manage the performance of team members and outside resources to meet the project requirements.
- Establish project plans (scopes, schedule, cost estimates, procurement/contracting strategy, project acceptance criteria, etc.).
- Work with business in the preparation and approval of Appropriation Requests.
- Conduct project meetings and document key issues, action items and decisions.
- For key projects, establish and coordinate activities of a steering committee for the project.
- Provide periodic project updates to customer and division management.
- Manage the project to meet the requirements.
- Implement safety program to ensure that LTAs and Recordable Incidence rate = or < Corporate targets.
- Conduct a project critique at completion and share key learning’s with others unassociated with the project.
Facilities Engineering Project Manager (Cont.)

Travel Requirements:
- Able to travel extensively including overseas. Assignment could involve long term domestic or international assignments.

Hours of work/work schedule/flex-time:
- Basic work hours are dependent on the particular assignment. Individuals need to work the hours required to complete the assignment. Work hours can vary from 40 to 60 hours per week depending on the needs of the project

Required Education:
- BS Mechanical, Electrical or Civil Engineering
- MS or MBA preferred

Required Years and Area of Experience:
- 10 to 15 years overall experience and 5 years in Project management
- Professional Engineering registration or PMI certification desired

Twin Tiers Chapter – Employment Opportunities

LaBella Associates, D.P.C. is one of the area’s Top 2015 Workplaces. We are headquartered in Rochester’s High Falls District with offices across New York and in Maine, North Carolina, Ohio, Pennsylvania, and an office in Madrid, Spain. We are a multi-disciplined architectural and engineering firm dedicated to client satisfaction through teamwork, respect, and trust.

We are currently seeking a Senior Mechanical Engineer to lead mechanical project teams in our Elmira Heights, NY office. Project work will involve clients in multiple Market Sectors. This position will report to the Mechanical Engineering Discipline Leader.

Responsibilities:
- Work closely with the mechanical engineering staff to develop concepts, strategies, construction documents and engineering reports for new building and renovation projects.
- Assist the energy group in conducting Energy Audits for Municipal, Commercial, and Industrial clients.
- Recognize energy reduction potential in buildings through the use of high efficiency equipment.
- Mentoring, guidance and performance appraisal for the mechanical engineering team.
- Client and Business Development.
- Proposal writing to initiate new business.
- Work with Commissioning Teams as necessary to provide reinforcement to this market focus.

The ideal candidate will possess:
- Bachelor’s degree in Mechanical Engineering.
- Minimum 10 years engineering experience with a professional A/E services firm.
- Strong writing, organizational and communications skills.
- Ability to work under pressure, and multi-task efficiently.
- A New York PE license is mandatory.
- Familiarity with NYSERDA and the related incentive programs.

Resumes should be accompanied by a cover letter demonstrating how your past experience qualifies you for this position. All inquiries will be kept confidential.

LaBella offers a strong benefits package including health insurance, dental insurance, professional development, paid time off, 401k and much more.
